

Aman Sah

Junior Software Engineer | Full Stack Developer | AI Engineer

Kathmandu, Nepal | sah99017@gmail.com | [+977-98XXXXXXX](tel:+977-98XXXXXXX) | linkedin.com/in/aman-sah9814 | github.com/SAman-9814

PROFESSIONAL SUMMARY

Motivated Junior Software Engineer specializing in Full Stack Development and AI Engineering with hands-on experience building MERN and PERN stack applications, AI-powered tools, and workflow automation using n8n. Skilled in React.js, Next.js, Node.js, and LLM integrations, with a proven track record of delivering end-to-end web and AI solutions. Eager to contribute to a forward-thinking team and grow as a full stack and AI-focused engineer.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS

Backend Development: Node.js, Express.js, REST APIs, GraphQL, Strapi CMS

Databases: MongoDB, PostgreSQL, Mongoose, Prisma ORM

AI & Automation: LLM Integration, OpenAI API, Factory AI, AI Agent Development, n8n Workflow Automation, WhatsApp Business API

Stack Expertise: MERN Stack, PERN Stack, Full Stack Development, Headless CMS Architecture

Tools & DevOps: Git, GitHub, Docker (Basics), VS Code, Postman, npm / yarn, CI/CD (Basics)

Methodologies: Agile, Scrum, RESTful Services, API Integration, Version Control

WORK EXPERIENCE

Full Stack Developer | [SolutionPath Technology Pvt. Ltd.](#)

Jan 2025 – Present

Project 1: Full Stack Employee Management System

React.js | MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Built a role-based employee management platform from scratch, reducing HR manual workload by ~40% through automated attendance tracking and payroll calculation.
- Developed 15+ RESTful API endpoints with Express.js and Node.js, handling employee records, leave requests, and payroll data.
- Designed and integrated a MongoDB database schema supporting multi-department data with efficient querying and indexing.
- Implemented JWT-based authentication with role-based access control (RBAC) for 3 user roles: Admin, Manager, and Employee.
- Built 10+ reusable React.js components with Tailwind CSS, improving UI consistency and cutting frontend development time by ~30%.

Project 2: Full Stack AI Multi-Vendor E-Commerce App

Next.js | PERN Stack (PostgreSQL, Express.js, React/Next.js, Node.js)

- Architected and delivered a multi-vendor e-commerce platform supporting independent vendor dashboards, product listings, and order management pipelines.
- Integrated AI-powered product recommendations using LLM APIs, increasing simulated user engagement by ~35% during testing.
- Designed a PostgreSQL relational schema with Prisma ORM, managing 5+ entity relationships across vendors, products, orders, and customers.
- Leveraged Next.js SSR and SSG to improve page load speed by ~50% and optimized SEO across 100+ product pages.
- Built a real-time vendor analytics dashboard tracking sales, inventory, and order status with dynamic chart visualizations.

PERSONAL PROJECTS

Full Stack AI Fitness App — *React.js | Strapi CMS | OpenAI API | Node.js | REST APIs*

GitHub: github.com/Saman-9814/LeetCode-Profile | **Live:** leet-code-profile-phi.vercel.app

- Designed and developed an end-to-end AI-powered fitness platform that generates personalized workout and nutrition plans based on user goals, fitness level, and preferences.
- Built a headless CMS backend with Strapi, managing 5+ content types (exercises, meal plans, user profiles, progress logs) served via REST APIs.
- Integrated AI models to auto-generate adaptive fitness plans, eliminating ~80% of manual content creation and enabling dynamic personalization at scale.
- Implemented user authentication, profile management, and progress tracking with interactive React.js dashboards, improving user retention flow.
- Reduced average content update time by ~60% by leveraging Strapi's admin panel for non-technical content management.

AI Agent — Doctor Appointment Booking — *n8n | WhatsApp Business API | LLM (OpenAI) | Workflow Automation*

GitHub: github.com/Saman-9814/React-Paste-App | **Live:** react-paste-app-dusky.vercel.app

- Designed and deployed a production-ready conversational AI agent on WhatsApp that automates the full doctor appointment booking lifecycle — from inquiry to confirmation.
- Built intelligent multi-step workflows in n8n handling natural language queries, real-time slot availability checks, booking confirmations, and automated reminders.
- Integrated LLM-powered intent recognition for context-aware, multi-turn conversation management, enabling the bot to handle edge cases and ambiguous inputs gracefully.
- Reduced manual appointment scheduling effort by ~70%, processing patient queries 24/7 without human intervention.
- Connected 3+ API integrations (WhatsApp Business API, calendar/slot service, notification system) within a single automated n8n pipeline.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science Engineering *Graduated: November 2025*

Jain University — Bangalore, India

CGPA: 8.0 / 10.0
